

At the EKOTEK NETWORK you can always get all kinds of construction items which are not standard available on the market.

applications

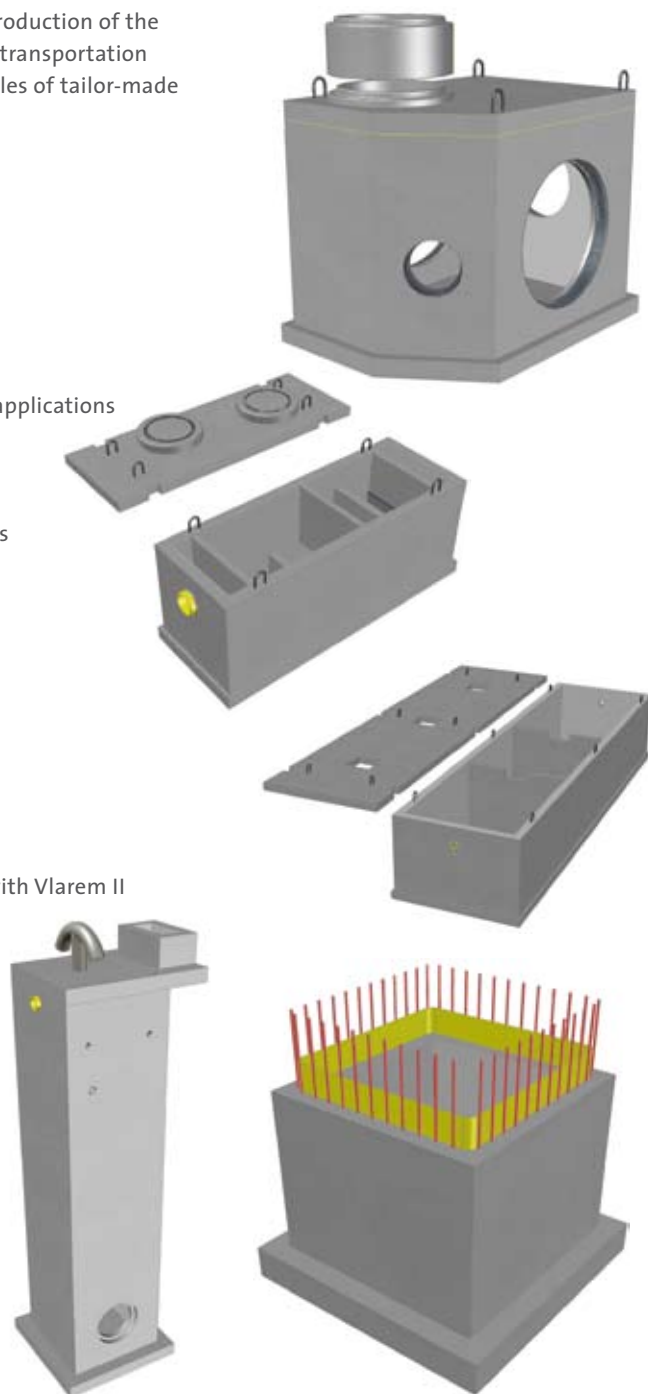

If you have a specific project, requiring a tailor-made solution, you are at the right address with us. The choice of a prefab tailor-made job ensures that on site you only have to focus on the installation and connection.

caracteristiques

- > All products are made of self-compacting concrete (compression strength up to 85 N/mm² possible)
- > Standard with Portland cement
 - Cement with high early strength
 - NBN B12-110
 - Portland cement HES meets the additional requirement concerning 1 day compression strength
- > HSR-cement possible
 - Cement with high resistance against sulfates - NBN B12-108
 - HSR-cement is applied in corrosive environments
- > Calculation notes (concrete study) of the reinforcements on demand
- > High flexibility due to application of system formwork
- > Attachments such as PVC sleeves, glip and slide seals, connectors, Stabox, water retaining plates, cast iron covers, spindle slides, seals, street pots, duct sections,... are poured in during production
- > For certain specific applications wall protection can be provided with HDPE or PP lining. These are poured in during production to guarantee perfect adhesion

On demand, besides the production of the items we can also provide transportation services to the site. Examples of tailor-made constructions are e.g.:

- > Buffer tanks
- > Cable and piping ducts
- > Calamity reservoirs
- > Cellars
- > Collectors
- > Containment systems
- > Control cabs
- > Cover plates for various applications
- > Draining ducts
- > Drawing chambers
- > Grease traps
- > High volume sludge traps
- > Lift shaft
- > Lubrication tanks
- > Oil and petrol separators
- > Outflow tanks
- > Overflow tanks
- > Pump tanks
- > Rainwater tanks
- > Retaining walls
- > Storage cabs
- > Technical areas
- > Venturis in accordance with Vlare II
- > Wash tanks
- > Water meter tanks
- > Water tanks
- > etc...

**Built in concrete.
Focused on water.**

The entire EKOTEK NETWORK team is ready to accompany you to find the most appropriate made to measure solution.
